SUMMARY

Frontend-first senior engineer with 9+ years building production web and mobile products across HR, fintech, EV, and enterprise domains. Deep expertise in React, Next.js, and TypeScript, with a strong focus on clean architecture, polished UI, and shipping interfaces that hold up under real users. Comfortable owning the frontend, end to end, from architecture decisions down to interaction detail and equally at home dropping into backend code (Node.js, NestJS) when a feature needs it. Recent work centers on complex, data-heavy SaaS products built with the modern React ecosystem: Tailwind CSS, Zustand, and React Query.

CORE SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Zustand, React Query, Redux, Context API, styled-components, SCSS, HTML/CSS

Backend: Node.js, NestJS, Express, FastAPI, REST APIs

Mobile: React Native (Expo), Flutter

Databases: PostgreSQL, MySQL, MongoDB / NoSQL

DevOps & Tooling: Docker, GitHub Actions, Jenkins, Azure (Functions), Git, NPM / Yarn

AI-Assisted Dev: Cursor - used to move faster while keeping ownership of what ships

Practices: Agile / Scrum, CI/CD, application security (2FA / MFA), Jira

PROFESSIONAL EXPERIENCE

Frontend & Full-Stack Engineer • BeneHR (Freelance)

Nov 2025 – Mar 2026

HR SaaS platform - Germany

Remote

- **Core product build:** delivered key modules of an in-production, GDPR-conscious HR platform for German SMBs, working in the modern React stack - Next.js, TypeScript, Tailwind CSS, shadcn/ui, Zustand for client state, and React Query for server-state and caching.
- **Employee Management:** designed and shipped the employee-management module (profiles, records, and team/organisational structure) as the operational backbone of the platform.
- **Payments:** integrated Stripe for subscription and payment processing, covering checkout, billing flows, and payment-state edge cases.
- **Time & Attendance:** built worktime tracking and absence handling with data-heavy, real-time views.
- **Requests & Workflows:** implemented the multi-step approval-workflow engine with role-aware actions and request routing.
- **Full-stack ownership:** built the marketing site (Next.js) end to end and developed its blog backend with NestJS - owning the work across the full stack rather than waiting on a backend engineer.

Stack: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Zustand, React Query, NestJS, Stripe

Senior Software Engineer • Near East Technology

Dec 2024 – Present

Nicosia, Cyprus

- Built the delivery feature for Oculus Coffees, a production consumer app, integrating Google Maps on Android and Apple Maps on iOS for live order delivery and routing. Integrated the payment gateway for product as well.
- Architected and shipped the in-app chat system for the KKGIAD production mobile application (polling-based), with live messaging powered by Pusher.
- Added production observability to the KKGIAD app with AppMetrica, instrumenting API error logging to catch and triage live failures.
- Built the mobile team's React Native (Expo) starter kit, shared components, authentication hooks, and state management, cutting setup time for new production apps by 80%.
- Designed a Flutter starter kit that standardised the foundation for all new Flutter products and removed repetitive scaffolding.

Stack: Next.js, React, React Native, Expo, Flutter, TypeScript, Node.js, NestJS, Pusher, Docker, PostgreSQL

Senior Software Engineer • Gunsel

Jun 2022 – Nov 2024

Punica - workforce & HR management platform • Nicosia, Cyprus

- Worked primarily on Punica, the company's workforce and HR-management product, owning features end to end (user flows, business logic, technical specs, release notes) while leading and managing the project engineering team.
- Overhauled the authentication system, adding 2FA, multi-factor authentication, and security logging to detect and block bad actors.
- Architected a serverless Azure Functions solution (timer and HTTP triggers) that replaced always-on servers and cut infrastructure costs by 20%.
- Set up CI/CD pipelines with GitHub Actions and introduced Agile, improving turnaround on features, bugs, and epics.
- On the EV side of the business, designed security protocols and encryption for the OCPP layer, protecting data exchanged between EV chargers and the backend.
- Built the parts of the EV user dashboard and mobile app, allowing users to be able to start/stop charging, track usage as well as monitor expenses on their charge cards.

Stack: React, React Native, TypeScript, Tailwind CSS, Azure, styled-components, Jira

Frontend Software Engineer · Geegpay / Raenest (Contract)

Feb 2022 – May 2022

Cross-border payments fintech · Remote

- Designed and built the customer-support web application for the fintech's operations team, enabling faster resolution of client issues across a large user base.
- Collaborated with the backend team to integrate APIs cleanly into the frontend, delivering a project that received positive stakeholder feedback.

Stack: React, JavaScript, Tailwind CSS, styled-components, SCSS

Software Engineer · Tropixel BS Limited

Dec 2017 – Aug 2021

Lagos, Nigeria

- Rebuilt the company's Flycash website in Next.js, migrating off the Silverstripe PHP CMS.
- Worked on several features on the dashboard (merchant, agents and customers).
- Developed CRUD APIs for product management and integrated payment gateways into web and mobile applications.

Stack: Next.js, React, Angular, JavaScript, PHP / Silverstripe, Tailwind CSS, styled-components, SCSS

EDUCATION

M.Sc. Mechatronics Engineering

Near East University, Cyprus

B.Sc. Mechatronics Engineering

Bells University of Technology, Nigeria
